FIELD NOTES

Illinois State Geological Survey

34f

B1 Campbell's bank. North side of SW/4 NE/4 Sec.30. Bank about 1/8 mile east of N-S road. Bench mark by house 544.
Elevation of bottom of coal 518. A.T.L."
Previously examined and limestone collected for fossils.
Coal 5' thick with blue shale and limestone above.
Blue bank 2°-0 [sic] thick. 8" above base.
Fireclay below. General Coal Report #512.

6d

B2 Jackson's bank. NE/4 SW/4 Sec.30.
Bench mark 577.
Elevation of top of fireclay below coal 544 A.T.L.
Bottom of coal not definitely found.
General Coal Report #528.

8a

B3 Edward's bank. (W.F. Edwards) in SW corner of Sec. 30 about 1/8 mile north of south and 100-150 yards east of west line.
Coal about 4' thick along eroded edge. Probably will increase in thickness toward the hill.
Elevation 480 A.T.L.
Bench mark by Edward's house 530.
Condition and altitude of outcrop led me to suspect this to be a lower coal than #7. No limestone seen.
General Coal Report #530.

(Note. B1 to B6: South from Crab Orchard through Sec.30, 31, 32, & 29.)
(Note. See map Sec.25 T9S R3E Franklin)
