FIELD NOTES

Illinois State Geological Survey

(2108.8a)

October 2, 1935.

Mining area.

Here mine both No. 5 and No. 4. Upper coal outcrops along side of hill about 600'. No. 4 about 20' below. Now mine lower bed at original mine and are putting in slope down creek 3/8 mile down to No. 4 which is about flood plain level. No. 4 about 6' thick - with gray shale roof and large concretions that lie in base and press down into coal about ½ way. Coal pretty dirty. Upper coal about worked out.

(2108.8e)

June 25, 1941 Cady and Parks

New mine (1940?) Near SW cor. of NW/4.

Parks reports as 48' deep. There are no mines operating at Ipava now.
