

FIELD NOTES
Illinois State Geological Survey

.b7 NW/4, SW/4, SW/4 Sec. 13-9S-4E Harrisburg #4,
Williamson county. Dec. 11, 1938

Slope mine _____.

To lower coal - Davis passes through upper-
bed about 30" with 3"-4" Bone in Middle. Lower
Coal (Davis) is all of 15' below Dekoven and is
said to be 33"-34" thick.

This is probably 10S, not 9S, as a
location in 13-9S-4E would be about
Harris Coal.

John Nelson 6/10/02
