

## FIELD NOTES Illinois State Geological Survey

## June 8, 1979

Spent most of the day talking with Russ Dyer and shown around the Sahara Pits. Inspected 5-24-1 (See Sec. 23 & 24, T.9S, R.5E), abandoned strip mine's highwalls, and found no evidence of lake deposits, but did find some nice loess sections that should be measured.

Went back early in order to make some phone calls and other necessary arrangements.
