## FIELD NOTES Illinois State Geological Survey

July 10, 1932 Slope on west bluff of creek

Run by Templeton - not worked. Full of water

## FIELD NOTES

## Illinois State Geological Survey

July 10, 1932

(1123.1e)

Exposures in NW/4, Sec. 24- south of Hudgins - station #1

Station #1

Drift and sandstone 15'
Gray shale 6'
Black slate 10-18"

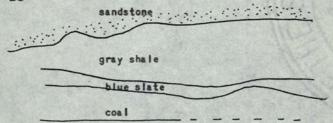

Coal 4' estimated

Top of coal is about 25' below surface of water at drift opening.

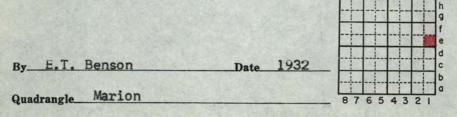

Black shale variable in thickness.

Water is about 4' below top of shale beneath sandstone.

Base of sandstne is very irregular and cuts down into gray shale about 2' in lateral distance of about 13'

Holes drilled in Hudgins area by Nason Coal Company, Templeton of Carterville, and Campbell of Chicago, Askew of Marion - probably can be collected.

County Williamson
