NEW MINES.

The Kellyville Coal company has sunk and equipped a new shaft which will be known as No. 5. It is located about three miles northeast of Westville, Vermillion county.

After two unsuccessful attempts and the expenditure of a large sum of money, the Manufacturers & Consumers Coal company of Decatur, has completed the sinking of a shaft, situated on the Illinois Central railroad, about one mile north of the Sangamon river, in Macon county. The shaft is perfectly straight, 600 feet deep, and well timbered; the coal seam is number five and is four feet thick. The company is opening the mine, room and pillar, and contemplate putting in mining machines. The fan is in position and the work of completing the tower, engine house, and boiler room is being pushed as rapidly as possible. The intention of the management is to make this a model mine.

The Electric Coal company of Danville, has sunk a new mine, which is now in course of development; it is about 100 feet deep to the No. 7 or what is called the Danville seam; the tower is finished, also the engine house, and boiler room; the engines and other machinery are also in place. The escape and air shafts are completed and the fan for ventilation is in position. Everything about this mine, in the way of equipment, is first class and up to date. The mine is located on the Big Four railroad, four miles west of Danville, Vermillion county.

The Tower Hill Coal Mining company has just finished sinking a shaft at Tower Hill, Shelby county. The seam reached is number five and is 8½ feet thick, at a depth of 802 feet.

PROSPECTIVE MINES.

The Westville Coal company is sinking a shaft about one mile north of its present mine in South Westville, Vermillion county.

E. S. Gray of Danville, is sinking a new shaft about six miles west of Danville, Vermillion county, on the Big Four railroad.

The Blue Mound Coal company is sinking a shaft at Blue Mound, Macon county, on the Wabash railroad about ten miles southeast of Decatur. These are all to be operated as shipping mines. There are a number of new
