 Elevation of
 L W

5/14/38 Mr. John R. Reynolds gave me the following information. At his two tippie location, the coal is 11 feet higher at the most easterly tippie than it is to the west. A drill hole was put down in the NW $\frac{1}{4}$ Sec 26-9-7 (see map). #6 at 40 ft. (2 feet thick) and #5 coal at 110 feet, 70 ft. below #6.

In the old Temple Castle mine, there was a fault (see map) in which the coal was thrown up 18 feet on the west side of the fault.
