102' (TES) Topy 5-5.5"
 County Sangamon Quadrangle Tallula Index No. N735E8
(159)

Tallula Quad

1911

Mine 3½ mi East Pleasant Plains
Owner Ed Golladay,

Shaft 108 to top of coal: double
compartment Horsepower hoist.
Steam engine for fan. This is No 5
no other coal worked this side of
Chatham Beyond Chatham is No 6
So thru top bed of coal 2 feet thick
that to be 50' above No 5 here, but
100' elsewhere. - - - - -

Workings extend about 300' east
Coal 3½' to nearly 6' many horsebacks
and clay veins. Horsebacks run thru
the coal. Clay floor + few rolls. Much
timbering clay fairly soft and they
must guard against squeezes.

Above coal is 18" to 4' of shaly clod
above which is said to be sandstone
maybe soapstone - very few concretions.
The draw slate or clod below rock comes
down - is mostly gobbled back

Room + P. system. 4 yrs old

In going down went down 18' dirt + 22'
hard pan then shale. upper bed of coal
not recorded - doubt fully present
no water encountered - very little depth coal

No E 1' to 1 rod (?) yet water runs naturally
to sump in bottom + is there hoisted by barrel.
Last year 18,500 bu lump. 4150 tons other grade.

Elev shaft top = 573
