## FIELD NOTES Illinois State Geological Survey

0712.6b

November 10, 1937

Purity mine - new mine being opened

1380 east of W line; 135 north of Shiloh Road

SEA SWA

Said to be about 160° to coal. Altitude of curb about 575± T.M. (topographic map)estimate (field) Altitude top coal 415±

Mine operated by Ed Randle and family

The shaft encountered a thick water bearing sand 25-30 feet from which about 250 gallons per minute of water issued. Finally cement off. So very little water now made in shaft.
