

FIELD NOTES

Illinois State Geological Survey

December 25, 1928 Waterloo Quadrangle

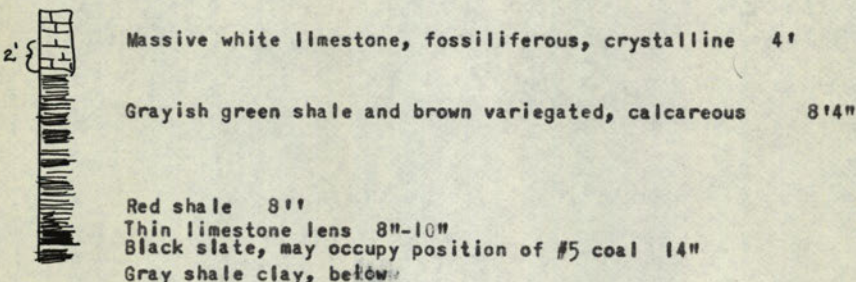

h2

Abandoned mine near RR. Elevation 535'. Coal rises slightly to the north. Up stream 100 yards St. N25°W
Dip 5°W

a6

Altitude of #5 (see below black slate) 540'

Believe this to be a part of the Penn. section near #5 shales similar to those in creek north of mine in Sec. 3.f8 below #6. Probably part of Penn. in horizon of #5 coal. Sec. 34f2 old mine reported. Filled in.
